PROFESSIONAL SUMMARY

Flutter developer building responsive, user-friendly mobile applications with reliable backend integration. Experienced with authentication, cloud databases, REST APIs, state management, local storage, routing, and maintainable project structure.

TECHNICAL SKILLS

- **Mobile:** Flutter, Dart, responsive UI, routing, reusable components
- **Backend & Cloud:** Firebase Authentication, Cloud Firestore, Supabase, Strapi, REST APIs
- **Architecture & State:** Bloc/Cubit, models, repositories, clean separation of concerns
- **Networking & Data:** Dio, Retrofit, JSON serialization, Hive, local caching
- **Tools:** Git, GitHub, Postman, VS Code, Android Studio, Windows, PowerShell

SELECTED PROJECTS

- **WeddWish - Graduation Project** - Flutter and web platform for shareable gift profiles. Worked on authentication, backend integration, storage, APIs, routing, and mobile UI.
- **Lift Log** - Fitness app foundations including login, registration, routing, user models, Firebase integration, and Cubit state management.
- **Meals App** - Firebase-connected Flutter app with authentication, Firestore profiles, favourites, cloud mapping, and UI state handling.
- **Multi-Agent Code Translation Research** - Repository-level LLM workflow covering planning, chunking, translation, repair, compilation, and testing.

EDUCATION

B.Sc. in Computer Science

ITCS - Big Data specialization

Nile University, 2026

GPA: 3.33 | Graduation Project: A

TRAINING & CERTIFICATES

- IBM RAG & Agentic AI Professional Certificate
- CCNA v7 Routing & Switching - 120 hours
- D-HUB + Orange AI Agent Developer
- Orange Data Analysis Crash Course
- ICPC problem-solving participation
